

Uniform Appraisal Dataset Redesign Moving Forward

Fannie Mae and Freddie Mac (the GSEs) and industry partners continue to work on the UAD redesign. This extensive project is a multi-year joint effort to update the dataset and replace existing appraisal forms with a dynamic appraisal report.

After years of consultation with Fannie and Freddie, the SFREP development team is currently hard at work on this important project. Beta testing and initial release are still a long way off, but rest assured we will be ready. Although subject to change, the timeline below gives a current estimated time for completion. Visit Fannie Mae's [website](#) for current information.
